Big Surfboards Will Bear Riders Upon Waves at Waikiki Beach.

This afternoon the visitors from the Cleveland will have an opportunity to witness the peculiarly Hawalian sport. of surf riding. Out at Waikiki, where the long shelf of coral makes shoal water and the big rollers of the Pacific come feaming in for nearly a mile from the edge of the reef right up to the shore, dozens of young athletes but really very difficult art of standing on a flat board and being carried at express train speed on the slope of a foam topped wave.

Unfortunately the surf has not been very regular of late. With the more expert riders the higher the wave and the more the force with which it breaks, the better for the surfer. But since Thursday the surf has shown signs of increasing and indications point to a very passable surf this afternoon,

Unless one has tried it and has learned how to manipulate the clusive board, it is impossible to understand the glorious exhibitation that thrills a surfer when, once the board is started before the wave and the rider has attained and just as easily given a start before an upright position, he rushes onward toward the shore while the foam froths and surges round him in frantic attempt to overwhelm the little board that charge. Then the passengers have noth- a sidewheeler, slow, and her best acdances always in front and is never ing to do but take hold of the cause commodations were not nearly so good

The boards vary in length from six to ten feet and are usually about thirty inches wide with a square stern and a rounded and beveled bow. To learn ficult matter when it is done in the small, or "malihini" surf. Here the embryo surfer can wade out nearly half his board standing on the ground,

In Mark Twain's Day.

The present world-tour recalls Mark n more ways than one. First

No alien land in all the world has any deep, strong charm for me but that one; no other land could so longingly and beseechingly haunt deeping and waking, through done. Other things leave me, but it abides; other things change, but it remains the same. For me its balmy airs are always blowing, its summer seas thashing in the week: the pulsing of its surf beat is in my ear; I can see its garlanded eralgs, its leaping cascades, its plumy palms drowsing by the shore; its remote summits floating like islands above the cloudrack; I can feel the spirit of its woodland solitudes; I can hear the plash of its brooks; in my nos rils still lives the breath of flowers that perished twenty years ago.
